

### INSTRUCTIONS

Before the huddle, print out some copies of the Injury Trends handout that best applies to your organization. From the information provided on the handout, develop several trivia questions such as “what is the most common way staff in our line of work are injured?” You can use these to run a short game during the huddle. Consider getting some small prizes (e.g. candy or dollar store items) that you can hand out when staff provide correct answers.

During the huddle, give a handout to each staff member and explain the game. Once you have finished the game, use the guiding questions to facilitate a discussion to summarize and apply their learning.

Handouts available at: [www.safecarebc.ca/safetyhuddles](http://www.safecarebc.ca/safetyhuddles)

### AFTER THIS HUDDLE

Staff should be able to:

- Know the consequences of getting injured at work.
- Understand how injuries affect everyone in the workplace.

### NOTES TO THE HUDDLE LEADER

- When asking staff why being safe matters to them, encourage them to share personal stories.
- Ask staff to consider how their personal safety at work is important for their life as a whole, not just in the moment at work.

## Workdays lost to injury: 82,515 (2014-18)

That's like losing the equivalent of 330 full-time staff

## GUIDING QUESTIONS

- What advice would you give a new staff member to help them stay safe at work?
- Why does being safe at work matter to you?
- How does your personal safety affect the quality of care we provide as an organization?
