

Pacific Rim Distilling Sanitizer Product Information sheet

Pacific Rim distilling is a small batch craft distillery located in Ucluelet on Vancouver Island BC, we have recently made the transition from consumable alcohol to sanitizer. Our sanitizer is still made with barley sourced from farms on Vancouver island that is then malted in Victoria bc (we feel it is important to keep with our previous supply chain to support local farmers and malt master). You will notice a pleasant floral aroma to the sanitizer, it is still not consumable.

Product Ingredients

- | | |
|----------------------|--------|
| 1. Ethanol | 75% |
| 2. Glycerine | 1.45% |
| 3. Hydrogen Peroxide | 0.125% |
| 4. Distilled water | 22.42% |
| 5. Aloe Vera | 1% |
- (helps combat dry skin from repeated sanitizing)

Pricing

- 20\$/L bulk (200L barrels)
- 25\$/L in 18.7L jugs *** We recommend this method, the jugs are the same as water dispensers. A pump can be mounted on top, employees can then bring a reusable container to a fill station.
- 20\$/750ml in glass bottles
