

# FACE SHIELDS

A Simple and Cost Effective PPE Solution

**Available now!** This PPE solution is very lightweight, easy to disinfect and extremely cost effective.

## HALO

Made of a polypropylene impact resistant copolymer resin featuring a double-halo design providing a comfortable fit that accommodates eyewear.

The lack of any substructure between the two halos allows the outer halo to absorb any impacts from bumps so the wearers don't feel it against their foreheads.

## SHIELD

Featuring 7mil polyethylene terephthalate (PET) material, this extra large shield is anti-fogging and measures 13" x 9".

This shield is larger than most on the market, and provides full face and neck coverage.

## LIGHTWEIGHT

## EASY TO DISINFECT

## COST EFFECTIVE
