The UVMATIC and UVMATIC Plus are the perfect solution to eliminate odour and reduce harmful bacteria on hard services. UVMATIC and UVMATIC Plus purification is proven to destroy viruses such as influenza and coronavirus as well as e coli, salmonella and similar bacteria.

The UVMATIC Air Purification

The UVMatic is a wall mounted air purifier, recommended for use in sluice rooms, wash-rooms and corridors. Even with the most vigorous and regular cleaning, odour can linger which can give the impression of poor hygiene standards. The UVMatic helps to resolve persistent odor problems by destroying bacteria in the air and on surfaces.

DDC-UVM0001

The UVMATIC PLUS Air Purification

The UVMatic Plus is a free standing unit that should only be used in empty rooms after staff or patients have left for the day. This unit is great for waiting rooms and other high traffic areas where a deep clean is required. A built in timer can be programmed to disinfect either continuously or in 10 minute increments.

DDC-UVM0003

Utility Cart
